

special guest Noam Chomsky

you may or may not have noticed but we don't use capital letters lightly here at turquoiseloop.com

Noam Chomsky has earned that privilege

indeed he is often described as the greatest intellectual alive. to say so is probably not too controversial but it gives only a fraction of the picture

he is often referred to as the world's leading dissident - a "rebel without a pause". truly he defines what it is to be a neo-humanist, a holistic thinker of the highest order

for us he is in the truest sense - an inspiration.....

chomsky.info

the following is from a recent interview talking about the recent financial crisis...
